

# Electronic Mathematics Education Seminar

## Rising to the Challenge of Diversifying the Mathematics Community

Alissa Crans,  
Loyola Marymount  
University

Dave Kung,  
St. Mary's College of  
Maryland

**Sept 18, 2018**  
**12:00 - 1:00 ET**

Underrepresented minority students are more likely to drop out of college. Minority students and women are more likely to leak from the STEM pipeline at every stage from middle school on. Why do we need to address these issues? What can we do in our classrooms, departments, and institutions to ensure that everyone has an opportunity to succeed? When faced with a challenging situation, what will you do to make our world a more just place? In this session, we'll dive into these issues - as an example of the kinds of professional development we provide to new mathematics faculty in MAA Project NExT.
