

# CONSISTENT FEEDBACK

1. Were there any aspects of class this week that you felt worked for you and would like to see more of?
2. Was there anything in class this week that you found to not be especially helpful (i.e. something I could do less of) or something that you felt could be improved?
3. Reflect on a specific problem of your choice from this weeks homework. Did you find it interesting? Challenging? Was there an aspect of the problem that grasped your attention and if so, what was it?
4. What was the most challenging topic from this week? What are your learning strategies to overcome this challenge?
5. Describe a mistake you made and what you learned from it.
6. Name two things you're proud of yourself for this week, and one thing you might do differently next week.
7. What learning strategies do you think might help in furthering your understanding of the material?
8. Do you notice any connections between this material and other mathematical subjects you've studied?
