Online Seminar on Undergraduate Mathematics Education
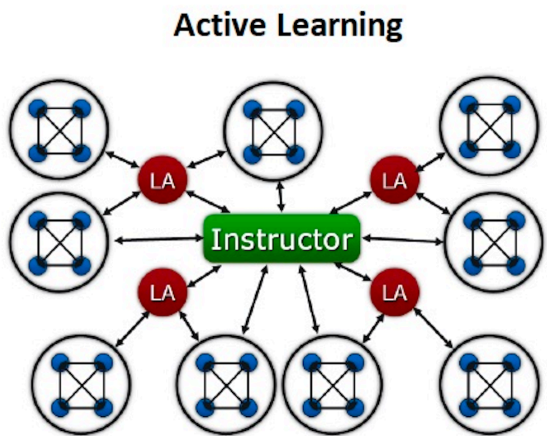

Active learning
in proof-based math courses

Lisa Carbone, Rutgers University

Active Learning

We discuss some initiatives at Rutgers math department that aim to bring active learning into higher level proof-based math courses. One such established program is active learning in our Intro Math Reasoning course, in collaboration with the Rutgers Learning Centers. Another recent initiative is an NSF funded grant to explore the possibilities of introducing active learning into 300 level proof based Linear Algebra.

Noon ET, November 7, 2023
