

# Online Seminar on Undergraduate Mathematics Education

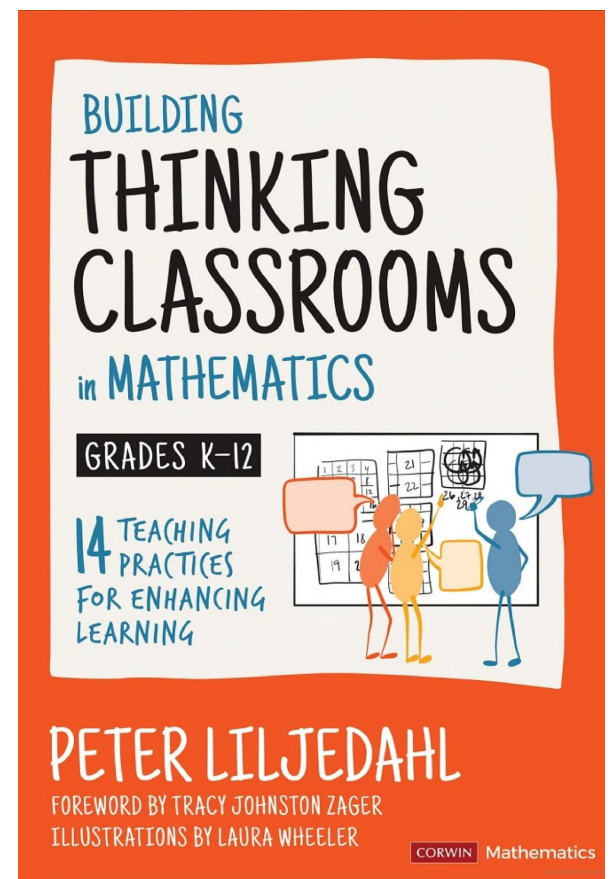

## Building Thinking Classrooms in the Post-Secondary Context

Peter Liljedahl, Simon Fraser University  
April Strom, Chandler-Gilbert Community College  
Christine von Renesse, Westfield State

Peter Liljedahl's book *Building Thinking Classrooms* provides a roadmap for teachers to "get more students thinking, thinking more, thinking longer."

In this OLSUME seminar, Peter Liljedahl will outline the principles of his book and dive into several of the 14 teaching practices that research shows optimize conditions for students to think, which increases their engagement and learning.

*Building Thinking Classrooms* has a large K-12 audience, but the ambitious goals and research-based strategies can also help frame instruction for math educators in a higher education context. Christine von Renesse and April Strom will share how they leverage these

**Noon ET, September 10, 2024**
