

# Online Seminar on Undergraduate Mathematics Education

## Spreading EMBERS: Eliminating Mathematics Barriers through Evidence-based Reforms

Dave Kung, TPSE

Project EMBER is a national initiative focused on helping higher education students succeed in introductory mathematics by aligning courses with their interests. It aims to eliminate math as a barrier by supporting Teaching Focused Faculty with resources to implement research-backed innovations. This session will provide an overview of the initiative, discuss systemic change approaches, and review progress. Attendees will engage, discuss, and explore opportunities to get involved.

**Bring a friend!** We especially encourage institution teams to attend, including teaching-focused faculty, research faculty, and departmental leaders.

**Noon ET, April 29, 2025**
